

It is not ethical to make any advertising claims that are untrue. Such practices are considered deceptive advertising and may result in lawsuits by your competitors.

### **YOUR TASK**

Review the information provided in the Workspace to ensure that there are no deceptive ads. If an ad is shown to be deceptive, you will be able to view an explanation as to why the ad is considered deceptive. You will then need to correct it if you do not want to face the risk of a lawsuit.

For more information on deceptive advertising, consult the Help file under [Deceptive Advertising](#).
